

M3V Data Management

Announces significant expansion of services

November 2009

INDIANAPOLIS, IN. M3V Data Management, LLC is pleased to announce that due to growth and demand, they have significantly expanded their offering of services. M3V has offered these services to select clients who requested customization to fit their particular needs. However, now these services are being offered as a standard part of the web based EH&S software applications “MSDS Explorer”, “Chemical Management Navigator” and “EH&S Task Manager”.

24 hour emergency fax back service: In case of an emergency or other catastrophic power failure or an internet outage, M3V maintains your compliance with the OSHA Hazard Communication Standard (1910.1200). Clients can call a special number to request that M3V deliver, via fax or email, a copy of any Material Safety Data Sheet in their MSDS software library. The call center is staffed 24 hours a day, 7 days a week, 365 days a year.

Push MSDS to customer: Now clients can request that M3V outsource their MSDS fulfillment to their customers. Clients may send requests via e-mail, fax or custom ftp upload and M3V will send MSDS records via hard copy, email or fax to their customers. MSDS management has never been simpler.

Web hosting of client MSDS records: M3V allows clients to place a special icon on their website for their customers to click to search for specific MSDS records. Instead of responding to individual requests with faxes and emails, this allows customers of M3V clients to search for MSDS records in a variety of ways.

Unlimited, free exports: M3V clients may now export all of their MSDS files or tasks and associated details at any time. Not only does this create a backup in case of an internet outage, but if M3V doesn't earn their place in your business, it is easier for clients to take their data and do something different.

M3V Data Management is a privately held corporation based in Indianapolis, IN. They have been providing web based environmental, health and safety solutions since 2002. For more information about M3V Data Management please visit their web site at www.M3Vsoftware.com, email at info@M3Vsoftware.com, or call 866-388-4815.
